Applicant's election with traverse of Group I, claims 1-5, in the reply filed on May 8, 2006 is acknowledged. The traversal is on the ground(s) that there would be no undue burden on the examiner. This is not found persuasive because additional searches for Groups II-V would be a serious burden on the examiner who has very limited time for the examination of the application. Applicant should appreciate since the examiner did not require an election of species and thus claims 1-5 present covers at least hundreds compounds.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as anticipated by Mueller et al (J. Org. Chem., Vol. 44, No. 25, Pages 4741-4742, 1979).

Mueller et al teach the instant compound (12) obtained by reacting the compound (10) and cyclohexene at page 4742, the structure 12 and the first full paragraph. Thus, the invention lacks novelty.

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
